WORK EXPERIENCE

DevOps Engineer Capgemini

06/2021 - Present

Pune, IN

Tasks

- Developed CI-CD pipelines for Java, JavaScript based microservices using Jenkins and GitHub Actions as a orchestration tool which resulted in improved delivery speed and consistent quality.
- Worked on Integration of security and vulnerability scanning tools like Sonar, Snyk, CodeQL etc. and security gating based on results of the above tools.
- Created numerous automation scripts using Bash/Shell scripting, PowerShell Scripting and Python Scripting, thereby decreasing manual work and improving automation for consistent results.
- Developed and maintained production level CI-CD pipelines using shared library or pipeline as code concept using Jenkins and GitHub Actions.
- Worked on deployment technologies and tools like Kubernetes, Pivotal CF.
- Worked on Azure, AWS for infrastructure provisioning and utilizing PASS offerings such as AKS, ECS, AKV and many more.
- Worked on Infrastructure provisioning tool Terraform to implement Infra As a Code concept.
- Completed migration of legacy applications with modern pipelines based on GitHub Actions Which eliminated manual deployments to the servers saving more than 95% of time and enormous manual efforts
